

# API Proficiency Testing Now Available for SARS-CoV-2 (molecular)

API is offering proficiency samples for the detection of SARS-CoV-2 (COVID-19) by nucleic acid amplification testing. Samples are non-infectious and contain the whole genome. Samples are available in either a liquid or swab format dependent on the sample type directly tested by your analyzer. API's proficiency samples serve as a full process check, allowing labs to test their entire workflow, including nucleic acid extraction, amplification and detection.

## SARS-CoV-2 liquid (molecular)

### Program Description

1.5 mL liquid - For detection of SARS-CoV-2 (COVID-19) using molecular methods. Contains the whole genome, providing sequence targets compatible with liquid based molecular assays.

### Program Information

385 SARS-CoV-2 liquid (molecular) \$100

### Analyte

SARS-CoV-2

### Format

2 samples

### Shipping Dates

Oct. 26

## SARS-CoV-2 swab (molecular)

**NEW!!**

### Program Description

Swab - For detection of SARS-CoV-2 (COVID-19) by molecular methods. Contains the whole genome, providing sequence targets compatible with swab based methods such as Abbott ID NOW and Mesa Biotech Accula.

### Program Information

386 SARS-CoV-2 swab (molecular) \$100

### Analyte

SARS-CoV-2

### Format

2 samples

### Shipping Dates

Oct. 26
