

# API Proficiency Testing Now Available for SARS-CoV-2 Serology

API is offering proficiency samples for the detection of SARS-CoV-2 (COVID-19) antibodies. Samples are non-infectious plasma that allow for the qualitative reporting of Total, IgG, IgM and/or IgA antibodies.

Proficiency samples are derived from naturally occurring material, collected via apheresis from patients that have recovered from COVID-19. Samples mimic patient samples, incorporating ranges encountered in clinical settings that allow laboratories to assess the accuracy of their test system.

## SARS-CoV-2 Serology

### Program Description

0.75 mL plasma, non-infectious - For qualitative reporting by methods detecting the presence of antibodies against SARS-CoV-2.

### Program Information

444 SARS-CoV-2 Serology \$180

### Analyte

SARS-CoV-2 (Total Ab, IgG, IgM, IgA)

### Format

3 samples

### Shipping Dates

Oct. 26
